### Performance By...

G07V88 performs best on medium- to coarse-texture soils. Avoid poorly drained, fine-texture soils. A semi-flex ear provides planting population flexibility but best performance has been below area-average planting populations. G07V88 is an excellent choice for rotated acres

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
