Performance By...

G10Z64 excels on coarse-texture soils. Because of a flex ear type, G10Z64 will perform best at or below area-average planting populations. G10Z64 is a good choice in any cropping rotation.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
