### Performance By...

G11U58 performs best in medium- to coarse-texture soils. Avoid poorly drained, fine-texture soils. A semi-flex ear allows for a wide range of planting populations. G11U58 is a consistent performer in any cropping rotation.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
