GREAT PERFORMANCE IN STRESS ENVIRONMENTS TO MINIMIZE WEATHER RISKS

- Ear flex provides population flexibility
- Superb seedling vigor for a strong start
- Sound agronomics allow for broad adaptability

Performance By...

G14V04 is a broadly adapted hybrid that can perform across all soil textures. G14V04 has a semi-flex ear that responds well at or below area average planting populations. G14V04 is a good choice for any cropping rotation but excels on rotated acres.

Published June 15, 2017. For use until July 01, 2018.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
