

THE FOUNDATION OF YOUR CROP NITROGEN PLAN

 PIVOT BIO
PROVE N40

For more information, contact your local Pivot Bio sales representative.

pivotbio.com | 877-451-1977

Create a solid foundation for your crop with the first and only predictable nitrogen source for corn. Pivot Bio PROVEN® 40 takes nitrogen from the air and converts it into plant-ready ammonia, applying it directly to the roots all season long. Make Pivot Bio PROVEN® 40 your first forty pounds of nitrogen.

PREDICTABLE - PRODUCTIVE - WEATHERPROOF
TURN TO A BETTER NITROGEN

Pivot Bio PROVEN® 40 **is a better nitrogen source** because it doesn't leach. **It's always there and always working.**

Brian Renelt
South Dakota

We're using Pivot Bio **first and foremost for the ROI. The time we save** by removing an in-season pass pays off.

Chad Rubbelke
North Dakota

Pivot Bio truly works. That's why we are **using it on every acre.**

EQUIPMENT INVOICE REQUIRED FOR REIMBURSEMENT

PURCHASE OF APPLICATION EQUIPMENT MUST BE COMPLETED ON OR BEFORE FEBRUARY 1, 2022.

Turn to a ***better*** nitrogen

Our nitrogen is more productive, more predictable and stays put, weather or not. Synthetic nitrogen can be lost to leaching, denitrification and volatilization. Pivot Bio PROVEN[®] 40 continuously feeds nitrogen to the corn plant throughout the growing season. Have the peace of mind to know that your crops are getting the nitrogen they need to succeed. Make Pivot Bio PROVEN[®] 40 your first forty pounds of nitrogen.

 PIVOT BIO
PROVE N40

Nitrogen that stays put. Weather or not.™
